

.....

Minimum Qualification Specifications
for the Class:

AIR CONDITIONING MECHANIC I

Experience Requirements

Four (4) years of progressively responsible experience in the maintenance and overhaul of air conditioning and/or refrigeration equipment as a helper or apprentice under a journey level air conditioning and/or refrigeration mechanic.

Substitution of Training for Experience

Training received at an accredited technical school in an air conditioning and/or refrigeration curriculum may be substituted for experience on a year-for-year basis up to a maximum of two (2) years.

Quality of Experience

Possession of the required number of years of experience will not in itself be accepted as proof of qualification for a position. The applicant's overall experience must have been of such scope and level of responsibility as to conclusively demonstrate that he/she has the ability to perform the duties of the position for which he/she is being considered.

Certification Required

In accordance with Section 608 of the Environmental Protection Agency's (EPA) Clean Air Act, 1990, as amended, certification as a Type I, Type II, Type III, or Universal technician is required.

Selective Certification

Specialized knowledge, skills and abilities may be required to perform the duties of some positions. For such positions, Selective Certification Requirements may be established and certification may be restricted to eligibles who possess the pertinent experience and/or training required to perform the duties of the position.

Agencies requesting selective certification must show the connection between the kind of training and/or experience on which they wish to base selective certification and the duties of the position to be filled.

Tests

Applicants may be required to qualify on an appropriate examination.

Physical and Medical Requirements

Applicants must be able to perform the essential functions of the position effectively and safely, with or without reasonable accommodation.

This is an amendment to the minimum qualification specifications for the class, AIR CONDITIONING MECHANIC I, which were approved on April 4, 1997

DATE APPROVED: 2/27/2012

BARBARA A. KRIEG, Interim Director
